

Mathematics – Clay Math and Montessori

At Chrysalis Center for Change mathematics is taught with a combination of Montessori mathematics curriculum and Clay Math (developed by Carmen McGuinness and distributed by the Phono-Graphix Reading Company).

Clay Math is a developmental foundational program aimed at teaching the concreteness of mathematics in advance of abstraction. Within a few sessions, children receive a firm foundation on which to build further mathematics instruction.

Montessori Math employs didactic manipulatives to support progression through the basics and into abstract operations.
